Frankfurt – Prolight&Sound 2014

Event Pod System – Color spotting at events, dinner tables, retail stores, parties, corporate functions – or anywhere -- has never been easier or more exciting! ADJ's Event Pod System is a set of 4 ultra-compact, lightweight (1 lb./0.25kg.) lithium-battery powered color-changing lighting pods, each containing 1 x RGB Tri-Color LED. Because it's battery-operated and highly portable, the Event Pod System can quickly be set up anywhere – even in places where there are no electrical outlets. Featuring 8 preset colors and 3 selectable color speeds, the system is also very simple to operate. It includes an easy-to-use ADJ Event-RC hand-held remote controller, which can send signals from up to 30 ft./10M away. Its rechargeable battery has a 5-hour life full-on and a 2-hour charge time.
