ADJ launches new Fog Machine Series

A Fresh and Dynamic design loaded with state of the art technology, ADJ launches our new FOG FURY series of fog machines.

The trio come with a solid metal case durable enough for everyday use in clubs or on the road. The new heat system, pump and circuits are designed to give maximum reliability and economic use.

The Fog **Fury 1000** is our entry level machine with a 650-watt heater and 3500 cu.ft/min output with a re-heat time of just 4 minutes so is ready when you need it most.

The **Fog Fury 2000** is our mid-level, portable 1100-watt machine with electronic Thermo Sensing. This reduces the power consumption to a minimum. With a huge 7000cu.ft/min output this makes it ideal for small stages and mid size clubs.

The **Fog Fury 3000** is our high output 1500-watt DMX machine. The built in timer, manual and DMX functions along with 21000cu.ft/min output makes this the only choice for large stages and super clubs.

The 2000 & 3000 both have a LED fluid Indicator showing the status of the machine and also indicates when it needs re-fueling.

All 3 Models will be available from March 2014 in all ADJ Partner Stores.
